

Induction Loops and Sound Systems

(basic requirements for DAC)

Please provide the following basic information:

- A floor plan (with a scale shown) of the Church marked up with the proposed locations of speakers, microphones, amplifiers, and any other equipment.
- Detail on the floor plan where the wiring will run (can be marked on floor plan) and provide details of cabling, points, plugs, etc.
- Detail on the floor plan where the induction loop will be located and how it is to be attached to the fabric of the building.
- A specification/quotation detailing all equipment and including specifications for all the equipment (brochures illustrations usually have this information).
- Photographs of the interior of the Church looking east and west.
- Photographs of the locations of the proposed speakers and any other equipment.

Failure to provide the relevant information may result in unnecessary delays.
